DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to method for assessing activity of p300-responsive promoter.

Group II, claim(s) 4 and 5, drawn to method for assessing binding between two proteins.

Group III, claim(s) 6, drawn to method for detecting btf nucleic acid.

Group IV, claim(s) 7, drawn to method for detecting btf protein.

Group V, claim(s) 8, drawn to making btf protein.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: group I involves p300-responsive promoter activity, group II involves binding activity of two proteins, group III involves detecting nucleic acid, group IV involves detecting protein, and group V involves making protein.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
